■ Mixing Time : 15 mins ■ Mixing Speed : 72rpm =2.5-5L tinter =0.5-1L tinter ■ Power : 400W/550W/750W (optional)

■ Options: explosion-proof motor / side hanging plate / working table / tinter shelf / back-storage shelf

Flexible choice of Layer height and width. Flexible configuration of big and small cans at same layer.

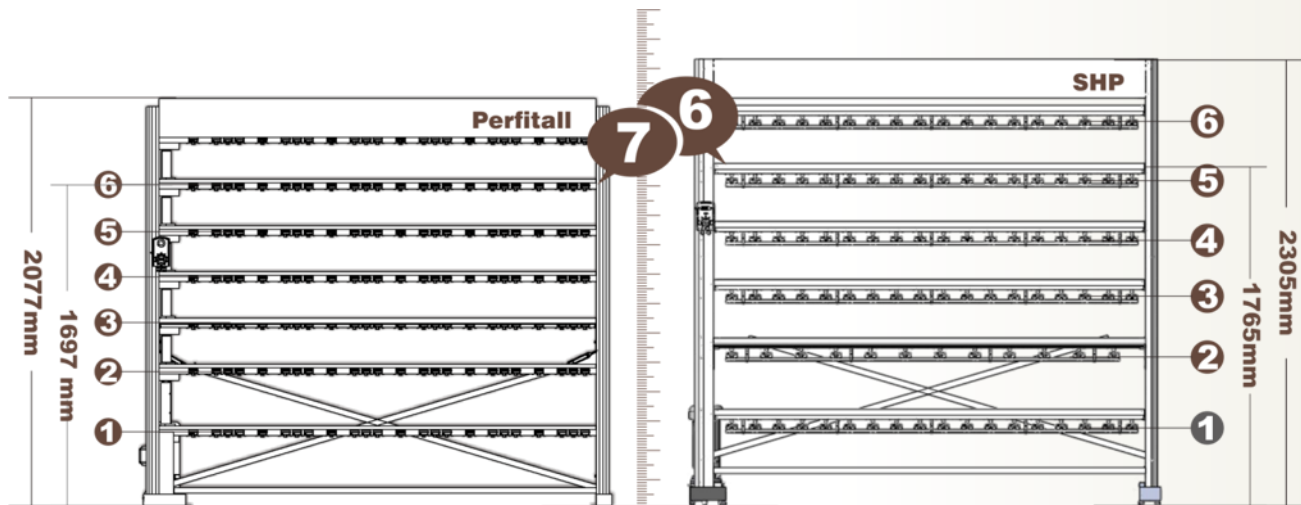

Innovative design makes 2 big cans=3 small cans. The positions of cans are flexible for your changing needs.

7 < 6 !

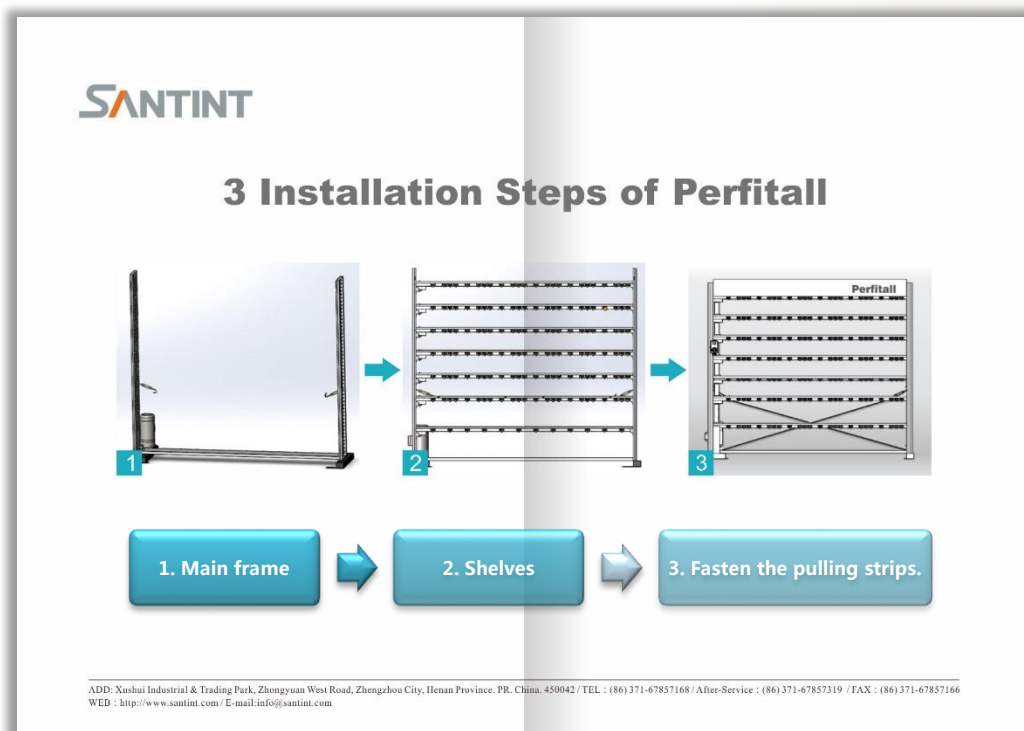

Lower height, more layers,
larger capacity.

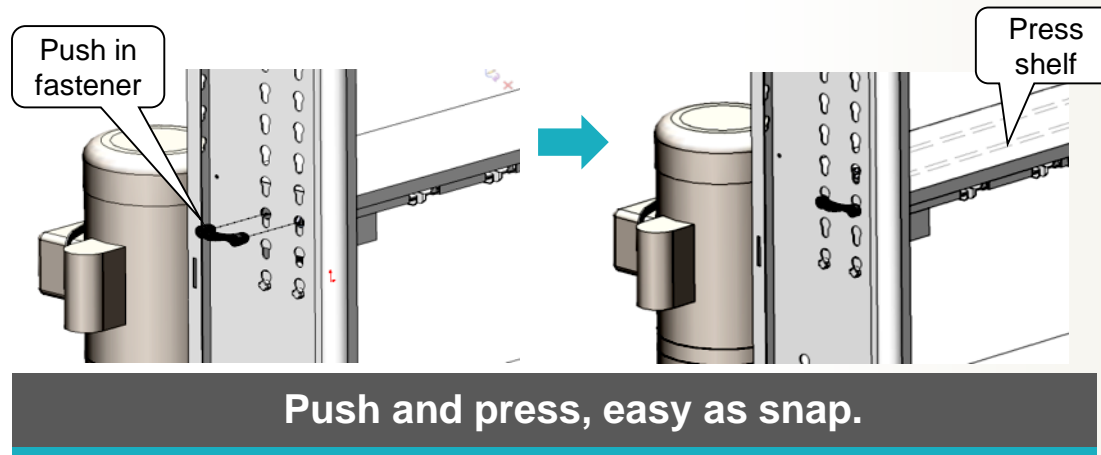

■ Riser Configuration

Perfitall Riser Configuration (Riser Height 2014mm)									
Layers Size	6			7				8	
0.5L	5	4	3	7	6	5	4	1	1
1L								7	6
2.5L	1	2	3	—	1	2	3	—	1
3.5-4L									—
5L									—

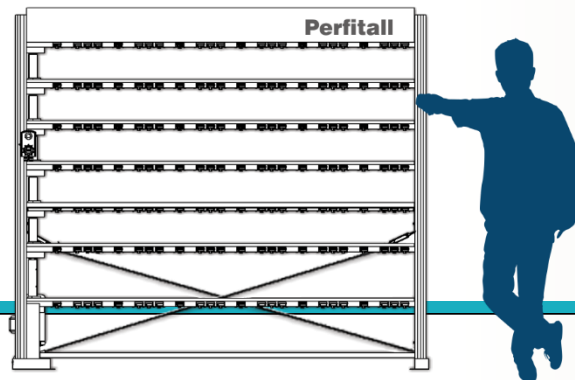

■ Simple Installation Steps

Innovative shelf installation

■ One person, three steps, half an hour.

■ Overall package

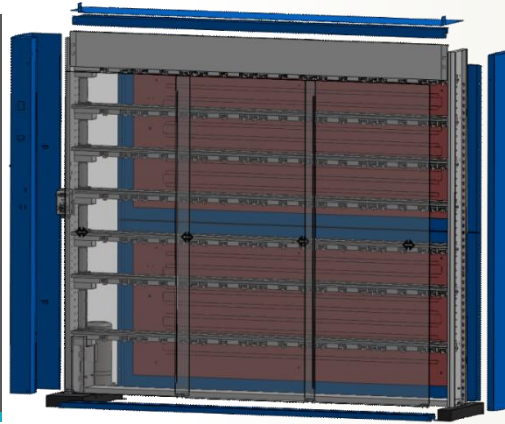

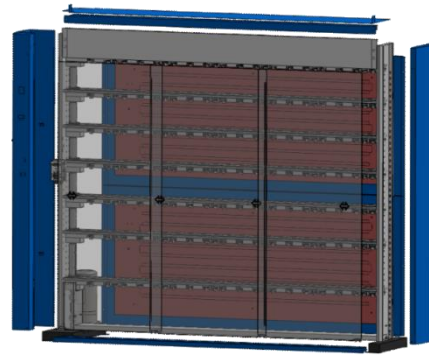

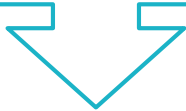

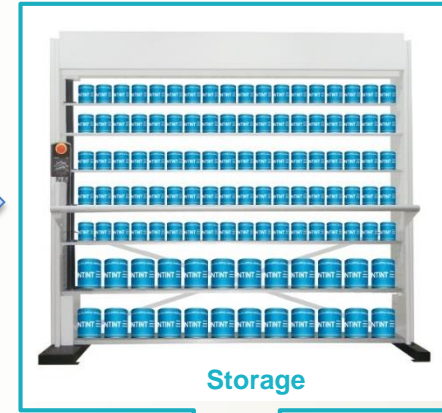

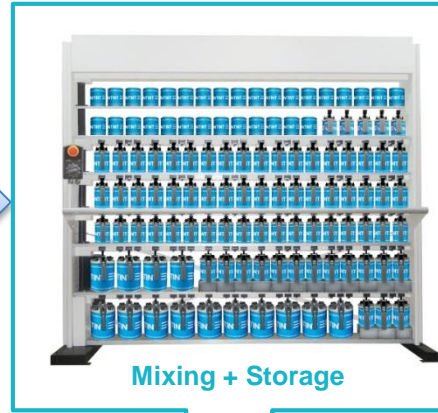

Pallet + carton + plastic package design is convenient for storage and safe for transportation.

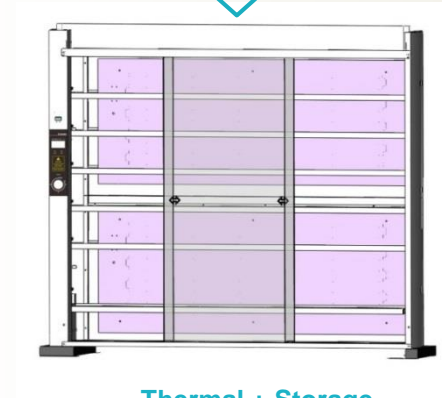

■ Ready for Change

Perfitall could be equipped with heating module without any modification.

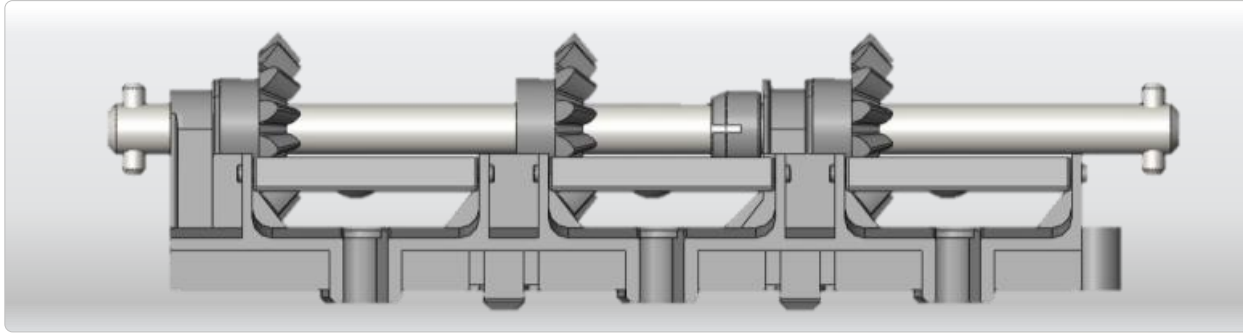

Thermal + Mixing + Storage

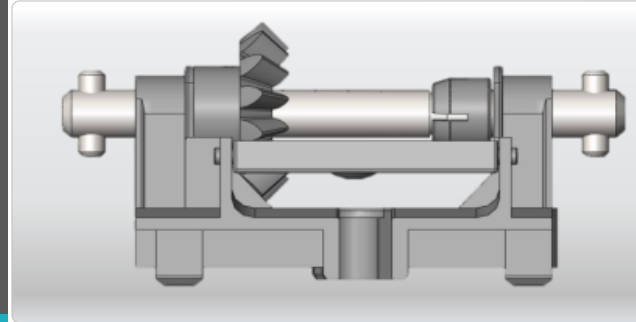

Thermal + Storage

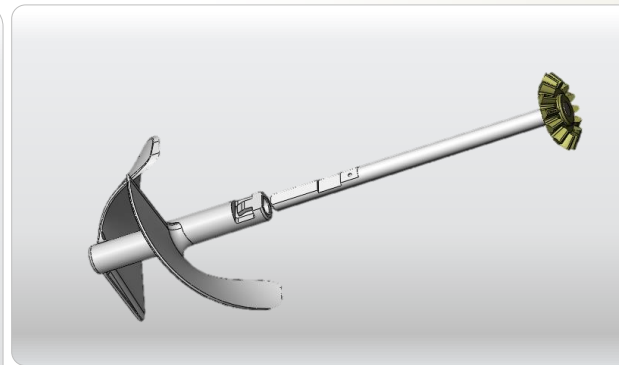

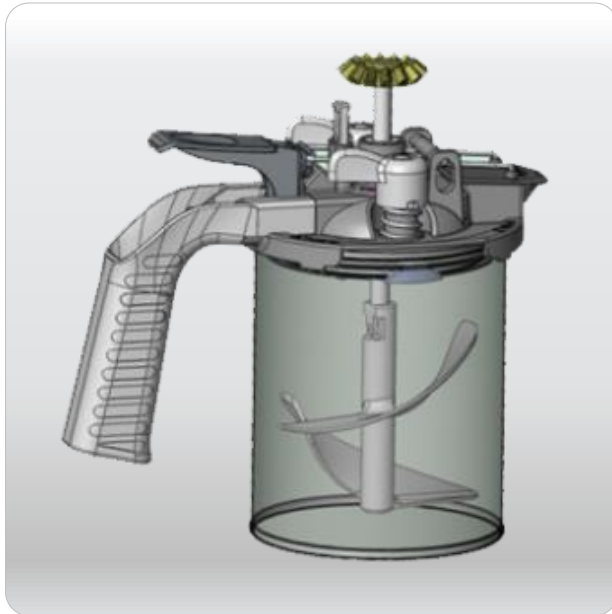

■ Gear-driven Module

Reliable performance.

Calibration-free, low noise.

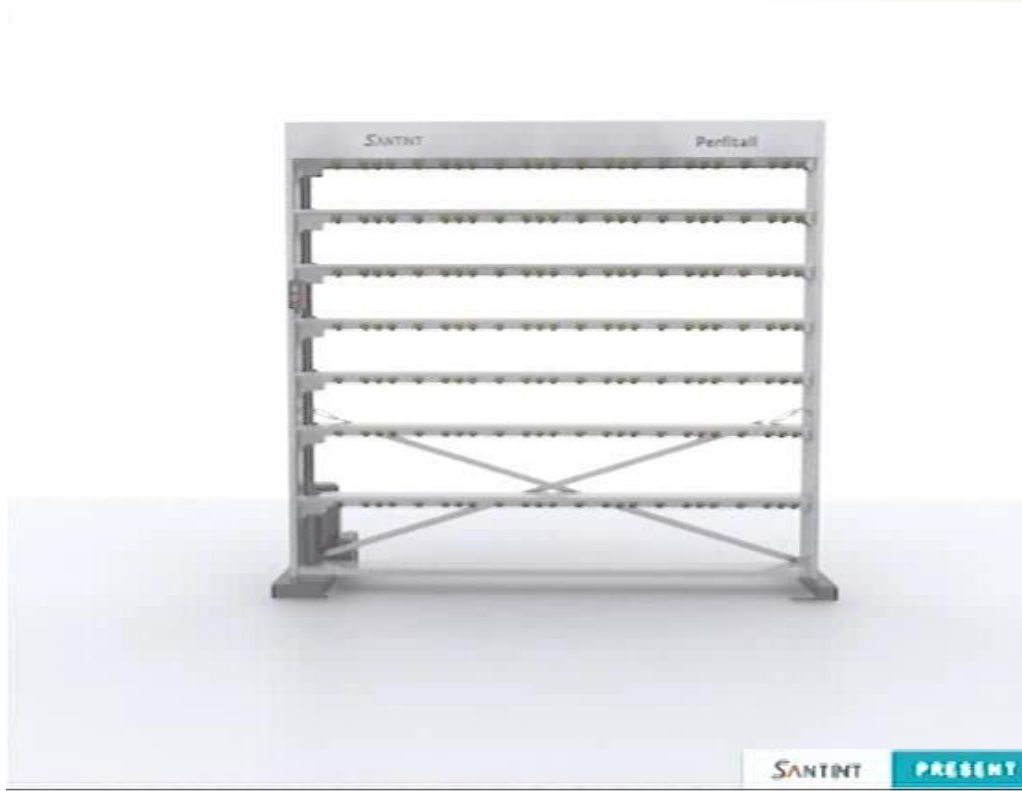

Simple and smart structure,
easy to install, self-adaptive to paint
can height.

■ Started layer by layer

Avoid over-loading, motor protection.

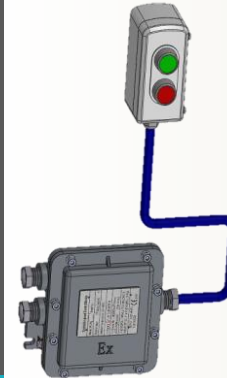

[Click to play](#)

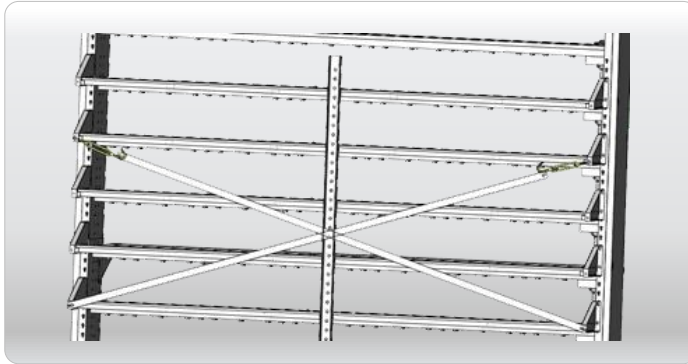

■ Explosion-proof Motor & Switch Box

■ Explosion-proof design.

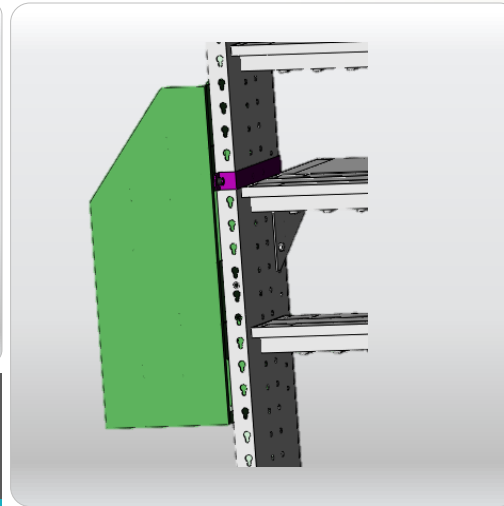

Atex, IECEx, and UL certified. In line with the safety standards in Europe and America.

■ Storage Shelf and Mica Shelf

Installation holes reserved on risers for installing and adjusting back storage shelf at any time.

No need to change existing structure. Suitable for module with/without hanging plate after adjustment.
